Detailed Action

Claims Objection

Claims 1-3 are objected to because of the following informalities:

(1) In claim 1, line 12, "an upper" should read --an upper blade--.

(2) In claim 1, lines 12-13, "said upper" should read --said upper blade--.

(3) In claim 3, line 4, "a position pin" should read --the position pin-- since it refers to the one previously cited.

Appropriate correction is required.

Claims Rejection - 35 U.S.C. 112, second paragraph

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(1) In claim 1, line 9, "the press block" has no antecedent basis.

(2) In claim 1, "said vertical hole" (at line 10) and "said push block" (at line 19) lack antecedent basis.

(3) In claim 2, lines 1-2, "a pull rod is provide with a connecting head" is confusing. Are the pull rod and the connecting head cited herein in addition to the ones cited at line 8 of claim 1?

(4) In claim 2, lines 2 and 3-4, "said connecting head" is vague. Is it the connecting head of the pull rod or of the lower blade?

(5) In claim 2, line 4, "a push block" is vague. Is it in addition to the one cited at line 19 of claim 1?

Claim Rejection – Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 6 of U.S. Patent No. 6,684,761. Although the conflicting claims are not identical, they are not patentably distinct from each other because they recite substantially the same invention with claim 1 of this

instant application having a broader scope (i.e. without the detailed structure for the compressing device).
